Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

Attorney Blackman agrees to amend claims to further distinguish over the prior art of record pending a conference with inventor. Attorney agrees to include language that would describe invention as a dry tablet rather than a gel constituting large amounts of water (approximately 70% water).

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)

i) ☒ It is not necessary for applicant to provide a separate record of the substance of the interview (if box is checked).

Unless the paragraph above has been checked, THE FORMAL WRITTEN REPLY TO THE LAST OFFICE ACTION MUST INCLUDE THE SUBSTANCE OF THE INTERVIEW. (See MPEP section 713.04). If a reply to the last Office action has already been filed, APPLICANT IS GIVEN ONE MONTH FROM THIS INTERVIEW DATE TO FILE A STATEMENT OF THE SUBSTANCE OF THE INTERVIEW. DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3-5,7-9,15,16 are rejected under 35 U.S.C. 102(b) as being anticipated by Bologna et al on record (US 5,543,150; 8/6/96).

Bologna discloses a composition comprising progesterone, cross-linked polycarboxylic acid (polycarbophil), and water soluble polymer (Carbopol 934P). Bologna teaches a method of delivering the composition to a mucosal surface (vaginal cavity). Progressive hydration does not mean that the composition is free of water.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bologna as applied to claims 1,3-5,7-9, 15,16 above in further view of Bologna above.

Art Unit: 1616

Bologna teaches all that is recited in claim 2 except for the composition/method comprising progesterone in about 50% or less. One having ordinary skill in the art would have been expected to determine the optimum amount of progesterone through routine experimentation. One would have been motivated to do this in order to make a composition and to develop a process that would supply progesterone to the vagina.

Claim Objection / Allowable Subject Matter

Claims 6,10,14 are allowable. The prior art does not disclose or suggest the instant composition and method comprising testosterone.
